

FOR IMMEDIATE RELEASE**Cognition Boosts Performance with Release of Cockpit 10**

Lexington, Massachusetts, USA – February 15, 2020 – Cognition Corporation, a leader in SaaS solutions for guided compliance in risk management and product development, has released a major new version of Cockpit, its platform for precision data management in product design and development. Cockpit 10 adds significant performance improvements for a better overall experience as well as new security features and expanded functionality.

“As the underlying platform for all of Cognition’s SaaS offerings, Cockpit’s development affects every one of our customers. That’s why our product development roadmap is driven by customer feedback and why one of our primary focus areas this past year has been, and will be going forward, performance. We are pleased to have been able to make significant performance improvements along with important new features and functionality,” said Dale Gallaher, president of Cognition Corp.

Major new Cockpit 10 features and functionality include:

- **Performance Improvements:** customers have reported up to a 35% improvement in overall performance, with performance for certain tasks improving up to 5x.
- **Item Level Review:** expanding on Cockpit’s comprehensive document review and approval functionality, users can now manage side-by-side reviews and approvals at the item level – bringing more flexibility and more granular control.
- **Apache:** supports Apache web servers for delivering content is now supported, including allowing use of Apache security controls.
- **Two-Factor Authentication:** support for Google Authenticator for increased security with two-factor authentication (2FA).
- **New Risk Management Feature:** introduction of additional risk classes (safety risk and FMEA row) improves risk management flexibility and control.

About Cognition Corporation

Cognition develops, sells, and supports product development and compliance solutions for the medical device and pharmaceutical industries and is trusted by the world’s leading life sciences companies.
